

## CASE STUDY SUMMARY: LATVIA

Number	SUMMARY	SECTOR
CS1	<p>HE E-learning network for Credit Transfer and eventually APEL: the CS describes the Valdermars network created by a partnership of universities and university colleges, aiming to create a “unified management system of LLL”. Against a background of a weak adult education sector, HEIs have developed a cross-university e-portfolio model to “control the learning process, provide quality assurance, validation and accreditation, as well as CATS (credit accumulation and Transfer systems). The network’s objectives are to develop joint methodologies and to provide joint e-learning CE programmes for working adults but also for younger students unwilling to attend full-time HE. It appears that so far the e-portfolio is operating like an e-record of achievement enabling CT between the network’s HEIs.</p>	HE
